

MIDTERM PROJECT

Privacy Under Pressure: Real-Life Data Privacy Situations

Group Members:

Rongie Murallos

Kate Ayala

Ellamae Jade Fucio

Erica Detablan

Ashley Astaño

SCENARIO 1: Hospital Data Leak

- 1. What personal data is involved in the situation?**
Full name, address, and contact number.
- 2. Is there sensitive personal data involved? If yes, specify what it is.**
Yes. The sensitive personal data involved are the medical condition and laboratory results.
- 3. What is the main data privacy or data protection issue in the scenario?**
The main issue is unauthorized sharing of the patient's medical record. A clinic staff member took a photo and shared it in a group chat without consent.
- 4. What risks or harm could happen to the person because of this situation? (Example: identity theft, scam, embarrassment, financial loss, etc.)**
The patient may suffer embarrassment, emotional distress, discrimination, damage to reputation, and possible misuse of medical information.
- 5. Was the personal data handled properly or improperly? Explain why.**
It was handled improperly because the clinic staff disclosed private medical information without permission. Health records should be kept confidential and secure.
- 6. Which right of the data subject may have been violated? (Be informed, Access, Correct, Erase, File complaint)**
The right to be informed because the patient was not informed that the record would be shared. The right to file a complaint may also apply.
- 7. What should have been done to protect the personal data?**
The clinic should have limited access to records, trained staff about confidentiality, prohibited taking photos of records, and used strict security rules for handling patient data.
- 8. Who is responsible for protecting the data in this situation? (Individual, organization, or both)**
Both, but mainly the organization. The clinic is responsible for protecting patient records, and the clinic staff is also personally responsible for the misuse.

SCENARIO 2: Posting Grades on Social Media

- 1. What personal data is involved in the situation?**
Full student names and Student numbers
- 2. Is there sensitive personal data involved? If yes, specify what it is.**

Yes. Grades and school records can be considered sensitive personal information because they are part of a student's educational record.

3. What is the main data privacy or data protection issue in the scenario?

The main issue is public or unnecessary sharing of student information in a Facebook group.

4. What risks or harm could happen to the person because of this situation? (Example: identity theft, scam, embarrassment, financial loss, etc.)

Students may feel embarrassed, judged, bullied, or pressured. Their academic information may also be misused by others.

5. Was the personal data handled properly or improperly? Explain why.

It was handled improperly because the teacher posted personal academic information in a way that exposed the students to others. Not everyone in the group needed to see each student's grades.

6. Which right of the data subject may have been violated? (Be informed, Access, Correct, Erase, File complaint)

The right to be informed may have been violated because the students may not have been told their grades would be posted publicly. The right to file a complaint may also apply.

7. What should have been done to protect the personal data?

The teacher should have sent grades privately, such as through individual messages, secure school portals, or personal report forms.

8. Who is responsible for protecting the data in this situation? (Individual, organization, or both)

The school and teacher are responsible for handling student records properly.

SCENARIO 3: Online Lending App Harassment

1. What personal data is involved in the situation?

Contacts list, Phone gallery, Location, Selfie and Phone number

2. Is there sensitive personal data involved? If yes, specify what it is.

Yes. The valid ID is sensitive based on R.A 10173

3. What is the main data privacy or data protection issue in the scenario?

The main issue is excessive collection and misuse of personal data. The lending app used Angela's personal data to harass her and contact other people.

4. **What risks or harm could happen to the person because of this situation?**
(Example: identity theft, scam, embarrassment, financial loss, etc.)
Angela may suffer embarrassment, harassment, identity theft, financial harm, stress, and damage to her reputation. Her contacts may also be affected.
5. **Was the personal data handled properly or improperly? Explain why.**
It was handled improperly because the company used her personal data for harassment and shared her debt situation with others without proper reason.
6. **Which right of the data subject may have been violated? (Be informed, Access, Correct, Erase, File complaint)**
The right to be informed, the right to erase or block, and the right to file a complaint may have been violated. She may not have been clearly informed how her data would be used.
7. **What should have been done to protect the personal data?**
The app should only collect data that is truly necessary, clearly explain why each permission is needed, avoid contacting unrelated people, and keep personal data secure and confidential.
8. **Who is responsible for protecting the data in this situation? (Individual, organization, or both)**
The lending company is responsible for collecting and using the data properly, while users should also be careful before granting permissions.

SCENARIO 4: SIM Registration Issue

1. **What personal data is involved in the situation?**
Full name, Address, Birthday and Selfie photo
2. **Is there sensitive personal data involved? If yes, specify what it is.**
Yes. The Government ID is sensitive based on R.A 10173
3. **What is the main data privacy or data protection issue in the scenario?**
The main issue is possible data breach or unauthorized access to registration information.
4. **What risks or harm could happen to the person because of this situation?**
(Example: identity theft, scam, embarrassment, financial loss, etc.)
Carlo may become a victim of scam messages, identity theft, fake account creation, and financial loss.

5. **Was the personal data handled properly or improperly? Explain why.**
It appears to have been handled improperly because the information may have been exposed or leaked, which led to scams and identity misuse.
6. **Which right of the data subject may have been violated? (Be informed, Access, Correct, Erase, File complaint)**
The right to be informed and the right to file a complaint may have been violated. Carlo should know how his data was used and protected.
7. **What should have been done to protect the personal data?**
The registration system should have used stronger security, limited access, encrypted stored information, and monitored for data breaches and suspicious activity.
8. **Who is responsible for protecting the data in this situation? (Individual, organization, or both)**
The organization handling SIM registration.

SCENARIO 5: Scholarship Application

1. **What personal data is involved in the situation?**
Home address
2. **Is there sensitive personal data involved? If yes, specify what it is.**
Yes, Birth certificate, Report card and Parent's income statement
3. **What is the main data privacy or data protection issue in the scenario?**
The main issue is failure to secure files. The documents remained publicly accessible through a shared Google Drive link.
4. **What risks or harm could happen to the person because of this situation? (Example: identity theft, scam, embarrassment, financial loss, etc.)**
The student may face identity theft, fraud, misuse of family financial information, embarrassment, and privacy invasion.
5. **Was the personal data handled properly or improperly? Explain why.**
It was handled improperly because confidential files were left accessible to the public for a long time.
6. **Which right of the data subject may have been violated? (Be informed, Access, Correct, Erase, File complaint)**
The right to be informed, the right to erase or block, and the right to file a complaint may have been violated.

7. What should have been done to protect the personal data?

The scholarship office should have restricted file access, used private sharing settings, removed files when no longer needed, and checked links regularly.

8. Who is responsible for protecting the data in this situation? (Individual, organization, or both)

Both, but mainly the organization managing the scholarship application files.

9. How can you protect your personal data in your daily online activities?

You can protect your personal data by sharing only the information that is really needed, using strong passwords, enabling two-factor authentication, avoiding suspicious links, checking app permissions before allowing access, using secure websites and networks, and not posting sensitive information publicly. It is also important to review privacy settings, log out from shared devices, and report suspicious activity right away. The data should be protected through safe handling, security measures, and responsible use.
